

VIBRO HAMMER

- ▶ High percentage of key component self-production rate. The quality control is implemented as per most strict standard.
- ▶ The multi-stage pressure-maintaining design of the clamp cylinder provides higher safety.
- ▶ High-strength, high-elasticity rubber blocks increase the vibration amplitude, reducing structural resonance, and increasing the lifetime of the equipment.

TYPE	FPD25	FPD35	FPD40	FPD45
A	2396	2526	2672	2672
B	798	821	897	897
C	1260	1420	1585	1585
D	193	193	362.5	362.5

Specification	FPD25	FPD35	FPD40	FPD45
Weight	2165 kg	2665 kg	3320 kg	3340 kg
Eccentric Torque	36 N.M	69 N.M	84 N.M	88 N.M
Excitation Force	36 T	51 T	73.5 T	78 T
Vibration Frequency	3000 RPM	2800 RPM	2800 RPM	2800 RPM
Max. Piling Depth	6-9 M	12 M	18 M	21 M
Suitable Carrier	18-25 T	27-35 T	36-44 T	40-55 T
